Post-Acute Care: Preferred Provider Networks Offering Value-Based Care Webinar

3:00 pm - 4:30 pm ET

Does your strategic growth plan position your agency as a partner in preferred provider networks? Does your agency have the knowledge and capabilities to offer “value-based care”? An aging population, shifting reimbursement models, increases in chronic disease states, and new care delivery models that extend beyond hospitals to post-acute-care providers are demanding the implementation of preferred provider networks. Simultaneously, value-based care and new payment models incentivize both acute- and post-acute-care providers to focus on greater coordination of care that emphasizes quality, cost effectiveness, and patient experience. This webinar will explain the benefits and requirements of value-based care providers. Learn the steps, data requirements, and other considerations to become and remain a preferred provider in a network that offers value-based care. One- and two-sided risk payment models and how to prepare your agency for participation in alternative payment models will also be addressed.

Continuing Education: Attendance verification for CE credits upon request

HPCANYS: Post-Acute Care Preferred Provider Networks Offering Value-Based Care
